CSR Initiatives

Bondh-e-Shams (Clean Water Project)

A portion of every aligner case submitted by a ClearPath doctor helps fund a solar-powered filtration plant that turns contaminated water into safe drinking water for underserved communities.

Health Clinics

Beyond mobile outreach, we've also set up permanent rural health clinics that provide essential and preventive dental care at little to no cost, ensuring accessible, safe and professional treatment for all.

Road Safety Initiative

ClearPath Cares has introduced a Road Safety Initiative focused on safety, compliance and employee well-being, including free helmet distribution and a mentoring session on road safety.

Mobile Dental Units

Through our Mobile Dental Units nationwide, we visit remote locations and provide free dental checkups, cleanings and preventive treatments to individuals who have limited or no access to dentists.
